1. DD/CA 3D49 Hqs				The attached memoranda requesting resource requirements for APEX implementation are self-explanatory. A couple of points to bear in mind:
2. DD/PTOS				a. The APEX package, including 4C operation, has already been included in the '82 submission. A copy of this package is attached for your review.
3.				
4.				b. This resource request includes FY81 requirements. Since 4C start-up costs have already been funded, there should not be additional costs for 4C in '81. However, are there other APEX costs or resources necessary in '81? Also in later years that are not provided for in the APEX package?

9.				Request addressees review their APEX/4C implemtnation and operational requirements to satisfy themselves that the resource requests we have already submitted are satisfactory, keeping in mind the DCI penchant for directing that any new requirements usually come out of existing resources. PPG will complete the ZBB forms, all we need are your requirements, detailed description and justification and impact statements.
